

FARNAZ BINA

FRONTEND ENGINEER

farnazbina.dev@gmail.com ·

[LinkedIn](#) · [Portfolio](#)

Frontend Engineer with 5+ years of experience building production-grade web applications, with a strong foundation in Vue.js/Nuxt.js and a current specialization in React.js, Next.js, and TypeScript. Experienced across healthcare, fintech, and SaaS products — delivering role-based dashboards, design systems, and performance-optimized interfaces (Lighthouse scores up to 98, 30%+ load time improvements). Skilled in state management, RESTful API integration, and scalable component architecture. Experienced working in cross-functional remote teams using Agile workflows. Open to remote full-time or contract opportunities with global teams.

STRENGTHS AND EXPERTISE

React.js, JavaScript (ES6+), TypeScript, Redux, Context API, RESTful APIs, HTML5, CSS3, Tailwind CSS, Material-UI, Responsive Web Design, Performance Optimization, Code Splitting, Lazy Loading, Cross-Browser Compatibility, Git, GitHub, Jira, Figma, Webpack, Vite, NPM, PNPM, Agile, Scrum, Remote Collaboration, Code Review.

PROFESSIONAL EXPERIENCE

Amniyat Parast Co - Frontend Developer

Sep 2025 - Aug 2026

- Engineered a fully responsive, high-performance website from scratch using Next.js and TypeScript, delivering seamless user experiences across all devices with Tailwind CSS.
- Built dynamic, type-safe forms with React Hook Form and Zod for robust validation, ensuring clean data submission and enhanced user experience.
- Implemented state management using Zustand, efficiently handling complex application state across multiple components and improving data consistency.
- Developed a full-featured admin panel with advanced filtering capabilities, enabling real-time tracking and management of registration data with intuitive search and filter functionality.
- Integrated RESTful APIs seamlessly with Next.js Server-Side Rendering (SSR) and Static Site Generation (SSG), optimizing performance and SEO.
- Wrote clean, modular, and maintainable TypeScript code following industry best practices, collaborating with cross-functional teams in Agile workflows to ship high-quality features on time.

Checkup Salamat - Frontend Developer - (concurrent with ArvinTav Co)

Dec 2023 - Feb 2026

- Engineered the full website from scratch, building role-specific dashboard panels for Admin and Physician users with robust RBAC and tailored features for secure, customized access.
- Implemented high-performance applications using Vue.js 3, Nuxt.js 3, Vuetify, and Sass, delivering consistent, scalable, and responsive UI components.
- Architected a comprehensive Design System with globalized styles, design tokens, and reusable components, accelerating development speed by 30% and ensuring visual consistency across the platform.
- Managed complex application state using Pinia (Vuex) and Composition API, ensuring predictable data flow across 50+ reusable components and seamless RESTful API integration.
- Wrote clean, modular TypeScript code adhering to best practices, improving long-term scalability and facilitating seamless team collaboration in Agile workflows.
- Optimized SEO and Lighthouse performance through SSR, code splitting, lazy loading, and image optimization, boosting Performance score to ~98 (40% improvement) and increasing Accessibility, Best Practices, and SEO scores by 30–40%.

ArvinTav - Frontend Developer

Dec 2024 - Mar 2025

- Designed and developed the complete frontend of a modern web-based financial platform from scratch using Vue.js 3 + Nuxt.js 3, Vuetify 3, Pinia for state management, and Sass/SCSS for modular, maintainable styling.
- Implemented responsive, interactive data visualizations with ApexCharts and Chart.js to display real-time financial metrics, portfolio performance, market trends, risk indicators, and transaction analytics for enhanced user decision-making.
- Authored clean, modular, type-safe code in TypeScript following SOLID principles, component composition patterns, and Vue best practices to ensure long-term maintainability and effective team collaboration.

Doctor Online Plus - Frontend Developer

Oct 2023 - Jul 2024

- Designed and built the complete frontend of a modern online appointment scheduling platform from scratch, implementing role-specific dashboards for Admin, Doctors/Specialists, Patients, and Receptionists with robust RBAC to ensure secure, customized user access and workflows.
- Developed a high-performance application using Vue.js 3 and Nuxt.js 3, integrating Vuetify 3 for consistent UI components and Sass/SCSS for modular, scalable, and maintainable CSS architecture.
- Architected and deployed a full Design System featuring design tokens (colors, spacing, typography), reusable base components, and layout utilities, ensuring visual consistency, accelerating development velocity, and simplifying long-term product maintenance.

Bit24.cash - Frontend Developer - (concurrent with Romina Co)

Jan 2022 - Sep 2023

- Collaborated effectively with a 9-person technical team on a digital currency exchange platform, utilizing Git for version control and pull requests to integrate code smoothly under technical lead guidance.
- Designed and implemented multiple custom internal panels, including warehouse management system, DevOps data management system, data analysis system, and a comprehensive super admin panel aggregating key platform data (users, transactions, orders) to support operational efficiency and oversight.
- Architected and delivered 4+ custom internal panels — including warehouse management, DevOps data system, analytics dashboard, and a super admin panel unifying users, transactions, and orders — improving operational visibility across the platform.
- Collaborated within a 9-person engineering team on a high-traffic digital currency exchange platform, contributing to code reviews and maintaining clean integration via Git and pull requests under technical lead guidance.

Romina Co - Frontend Developer

Jan 2022 - Sep 2023

- Designed and developed international websites featuring advanced scroll animations and interactive effects using GSAP and SmoothScroll technologies to deliver engaging, high-end user experiences across global audiences.
- Implemented full multilingual support with the i18n package, enabling seamless localization, dynamic language switching, and improved accessibility for diverse international markets.
- Customized and integrated a super admin panel using the Metronic admin dashboard template, configuring layouts, components, and UI elements to support comprehensive backend management.
- Integrated RESTful APIs and handled data fetching/processing within the Metronic-based super admin panel, ensuring real-time updates, secure data display, and smooth interaction between frontend and backend services for enhanced administrative efficiency.

Education & Certifications

Computer Software Engineering - Bachelor's Degree - Sep 2018 - Sep 2022

JavaScript Algorithms and Data Structures - freeCodeCamp - Issued Mar 2023
